**MARANTZ DEBUTS TWO BEST-IN-CLASS A/V RECEIVERS, PACKED WITH  
21<sup>ST</sup> CENTURY FEATURES AND PERFORMANCE ENHANCEMENTS**

*-- Models SR6005 and SR5005 Add Exciting New Features, with Bluetooth Capability, HDMI 1.4; New AVR Design With Fold-Up Front Panel and More --*

**NEW YORK, NY – July 21, 2010** - Marantz® America, a world leader of advanced home entertainment solutions, today announced the introduction of two leading-edge 7-channel audio video receivers, Models **SR6005** and **SR5005**, both providing consumers with comprehensive “best-in-class” feature sets, delivering heightened levels of performance, convenience and home entertainment flexibility. The SR6005, which will be available in September for a suggested retail price of \$999, will replace the Model SR6004 in Marantz’ lineup, adding to that acclaimed unit’s feature set with a built-in HD radio tuner, 6 HDMI 1.4 inputs, 7.2 dual subwoofer output and more. The SR5005, which will be available beginning in August for an SRP of \$799, will replace the Model SR5004, debuting a new fold-up front panel for clean look (which is also featured on the new SR6005) as well as increased power, satellite radio and more. Both new models have been upgraded to HDMI 1.4 (3D/Audio Return Channel), with front-panel USB connectivity for iPod® digital, plus upscaling of HDMI to HDMI 1080p video signal.

Noted Kevin Zarow, Vice President, Sales and Marketing, Marantz America: “The introduction of our new SR6005 and SR5005 receivers represents both a continuation of Marantz’ longstanding priority in audio excellence, as well as our commitment to the future of home entertainment with products that not only offer the ultimate in sound quality, but also feature the very latest connectivity and content-access technologies, with aesthetically pleasing, uncluttered designs and total user convenience.”

## **New Receivers Are Ideal for Advanced System Building**

Several innovative advancements enhance the new Marantz receivers and make them even more useful in building expanded home entertainment networks. Both models provide upscaling of the HDMI signal to HDMI 1080 video signal; the SR6005 features six HDMI inputs, the SR5005 features four. In addition, both the SR6005 and SR5005 feature front-panel USB inputs that are compatible with the iPod and iPhone™, and support playback of MP3, WMA and WAV files, and provide playback control via remote (Play, Stop, FF, BWD, Skip Forward, Random and Repeat Play), while showing music track information on the unit's newly designed Graphical User Interface.

Both models feature advanced processing and sonic enhancement technologies to ensure a superior listening experience and compatibility with today's highest quality sound formats. For example, both support audio bit-streams up to 320kbps, as well as featuring the latest Dolby Pro Logic IIz, Dolby True HD, and dts HD decoding. They also feature a full 10-bit video processor that supports an I/P converter for video scaling to 1080p from all analog sources as well as the transcoding of analog signals to HDMI. For total future-readiness, both models accept LPCM 7.1 signals from a Blu-Ray player and have dual component outputs as well as DC Triggers and RS232C.

Like all Marantz A / V receivers, both the SR6005 and SR5005 offer a wide variety of features and capabilities that will appeal particularly to custom installers. Marantz' elegant new shallower chassis design (< 16" deep) makes the units perfectly suited to rack-mounting, adding to installation flexibility, and additional room on the backside of the unit makes cabling easier and more convenient. A cursor-controlled menu system affords total ease of operation. Both models feature Audyssey Dynamic EQ, Dynamic Volume and MultEQ Auto Calibration.

## **Advanced Bluetooth Capability**

Like their predecessors in the line, both the Marantz SR6005 and SR5005 are Bluetooth capable home theater receivers, designed to utilize their innovative

back-panel M-XPort (Marantz eXpansion Port) to provide access to the Marantz **RX101** Bluetooth receiver (SRP: \$99.99). Powered by the receiver itself, the RX101 receives audio signals from Bluetooth-enabled devices (PDAs, PCs as entertainment devices, etc.) and sends them directly to the connected receiver, allowing users to enjoy great sound and more flexibility from their home entertainment sources. Users may listen to streaming audio from their Bluetooth-enabled cell phones, MP3 players, computers or other devices, including the iPhone™ and iPod Touch®. For total convenience, the RX101 may be placed anywhere in a room for ideal reception of a Bluetooth signal; and because the RX01 also functions as an IR sensor, users can literally hide their Marantz system behind closed cabinet doors and still control it by pointing their remote at the RX101.

### **About Marantz**

Founded in 1953, Marantz is a world-renowned manufacturer of premium home entertainment components, committed to upholding the tradition of technological superiority and outstanding performance initiated by founder Saul Marantz. The company's deep roots in audio and legacy of creating some of the world's most respected audio products have earned it a singular reputation for excellence and innovation. Building on this foundation, the three main pillars of the Marantz philosophy today are superior sound quality, impeccable design and total user convenience. Marantz audio and video components are carried by many of the nation's premier audio/video retailers and professional custom installers.
