Thank you for purchasing this Marantz product.
To ensure proper operation, please read this owner’s manual carefully before using the product.
After reading this manual, be sure to keep it for future reference.

**Accessories**

Check that the following parts are supplied with the product.

<table>

About the remote control

Inserting the batteries

1. Remove the rear lid in the direction of the arrow and remove it.

2. Insert two batteries correctly into the battery compartment as indicated.

3. Put the rear cover back on.

NOTE
- To prevent damage or leakage of battery fluid:
  - Do not use a new battery together with an old one.
  - Do not use two different types of batteries.
  - If the battery fluid should leak, carefully wipe the fluid off the inside of the battery compartment and insert new batteries.

Operating range of the remote control unit

Point the remote control unit at the remote sensor when operating it.

Approx. 23 ft/7 m
Main features

High quality sound

- **Large-capacitance block capacitor**
  A large capacitance 3,300 μF capacitor carefully selected for its acoustic characteristics is incorporated into the power supply circuit.

- **Audiophile-grade film capacitors and electrolytic capacitors**
  The unit’s features the same audiophile-grade film capacitors and electrolytic capacitors specifically used in top-range models.

- **Low noise amp due differential input HDAM, and equipped with a low distortion filter circuit due to high speed HDAM®SA2 delivery amp**

- **Double-layered chassis**

- **High-grade machined analog audio output connectors**

- **High grade headphone circuit**
  This unit has a two-amplifier structure based on the design concept of luxury models, comprising a current feedback voltage amplifier using the HDAM®SA2 and a feedbackless Darlington power buffer. This allows higher speeds without creating dynamic strain in response to impedance changes in the headphones.

High performance

- **Equipped with a USB-DAC function to support playback of high-resolution sound sources**
  This unit supports the playback of high resolution audio formats such as DSD (2.8/5.6 MHz) and PCM files up to 192 kHz/24 bits. It provides high quality playback of high resolution files.

- **DIGITAL AUDIO IN connectors (COAXIAL/OPTICAL)**
  You can play back PCM signals up to 192 kHz/24 bits by inputting digital audio signals from an external device into this unit.

- **Plays USB memory devices (MP3/WMA/AAC/WAV) and iPod®/iPhone®**
  You can play back audio files stored on a USB memory device or iPod/iPhone by connecting the USB memory device or iPod/iPhone to the USB port.
Peripheral circuitry off function minimizes audio output signal interference
In order to minimize noise from peripheral circuitry which could interfere with the analog audio signal, this unit is equipped with a peripheral circuitry off function which turns off the display.

Equipped with variable audio output connectors
In addition to the normal fixed audio output connectors, this unit is equipped with variable audio output connectors that cooperate with the volume of this unit. These can be connected to the Power Amplifier to adjust the volume.

iPod® auto detect charges your device even after the unit switches to standby mode (p. 20)

Equipped with auto standby mode function that reduces power consumption
Part names and functions

For buttons not explained here, see the page indicated in parentheses ( ).

Front panel

1. **Power operation button** (ô)
   This turns the power on/off (standby). (p. 25)

2. **Power indicator** (STANDBY)
   The standby indicator changes as shown below according to the status of the unit.
   - Power on : Off
   - Normal standby : Red
   - iPod charge standby : Orange

3. **Input source select knob (INPUT SELECTOR)**
   These select the input source. (p. 26)

4. **Display**
   Information such as the playback status and input source is displayed here.

5. **VOLUME knob**
   Adjusts the volume of the headphones and audio output connectors (VARIABLE). (p. 26)
6 **SETUP button**
   Used to set up this unit.

7 **Remote control sensor**
   This receives signals from the remote control unit.

8 **DISPLAY OFF indicator**
   This indicator lights up when the display is off. (p. 27)

9 **USB port**
   Used to connect iPod or USB memory devices. (p. 20)

10 **Headphones jack (PHONES)**
    Used to connect headphones.

**NOTE**
To prevent hearing loss, do not raise the volume level excessively when using headphones.
Display

The input source name, sampling frequency, setting values and other information are displayed here.

D/A converter display

1. Input source indicator
   This indicator displays the selected input source (USB-DAC/OPT1/OPT2).

2. Sampling frequency display
   This indicator displays the sampling frequency of the input audio signal.

iPod/USB playback indicator

3. Information display
   This indicator displays the track information, etc.

4. Playback mode indicators
   - : Displayed during playback.
   - : Displayed during pause.

5. Time indicator
   This indicator displays the elapsed time of the current track.
Rear panel

1. **AUX input connector**
   Used to connect a smartphone or portable player with an analog output. (p. 16)

2. **DIGITAL AUDIO IN connectors**
   Used to connect a computer or devices equipped with digital audio output connectors. (p. 17)

3. **Remote control input/output connectors**
   (REMOTE CONTROL IN/OUT)
   Used to connect to a Marantz amplifier that is compatible with the remote control function. (p. 22)

4. **AC inlet (AC IN)**
   Used to connect the power cord. (p. 23)

5. **AUDIO OUT connectors**
   Used to connect devices equipped with analog audio inputs connectors or an external power amplifier. (p. 16)
Remote control unit

1 DIMMER button
   Adjust the display brightness of this unit. (p. 27)

2 Input source select buttons
   These select the input source. (p. 26)

3 Skip buttons (Previous, Next)
   This skips to the start of the track. Press and hold to fast-forward/fast reverse. (p. 39, 44)

4 RANDOM button (∞)
   Switches the random playback. (p. 41, 45)

5 MODE button
   This switches the playback mode. (p. 40, 43)
Information button (INFO)
This switches display items such as the album name and title name in the playback screen. (p. 39, 44)

Cursor buttons (△▽◁▷)
These select items. (p. 39, 48)

BACK button
Returns to the previous item. (p. 48)

POWER button (●)
This turns the power on/off (standby). (p. 25)

Play/pause button (▶/■)
Plays back or pauses a track. (p. 39, 44)
11 REPEAT button (➡️)
Switches the repeat playback. (☞ p. 41, 45)

12 Stop button (■)
Stops playback. (☞ p. 39, 44)

13 VOLUME buttons (✚.ua)
Adjusts the volume of the headphones and the amplifier connected to the audio output connectors (VARIABLE). (☞ p. 26)

14 MUTE button (dbx)
This mutes the output audio. (☞ p. 26)

15 ENTER button
This determines the selection. (☞ p. 39, 48)

16 SETUP button
The setting menu is displayed on the display. (☞ p. 48)
### Contents

- Connecting an amplifier 16
- Connecting to a device with digital audio output connectors 17
- Connecting a PC or Mac 18
- Connecting a smartphone or portable player 19
- Connecting an iPod or USB memory device to the USB port 20
- Connecting devices with remote control connectors 22
- Connecting the power cord 23

**NOTE**
- Do not plug in the power cord until all connections have been completed.
- Do not bundle power cords with connection cables. Doing so can result in humming or noise.

### Cables used for connections

Provide necessary cables according to the devices you want to connect.

Connecting an amplifier

NOTE
Do not connect a power amplifier to the FIXED connectors. Connecting a power amplifier may cause damage to the speakers.
Connecting to a device with digital audio output connectors

Use this connection to input digital audio signals to this unit, and convert the signals for playback using the D/A converter of this unit. (p. 37)

NOTE
- Linear PCM signals with a sampling frequency of 32 kHz, 44.1 kHz, 48 kHz, 64 kHz, 88.2 kHz, 96 kHz, 176.4 kHz, or 192 kHz can be input into this device.
- Do not input non-PCM signals, such as DTS and AAC. This causes noise and could damage the speakers.
Connecting a PC or Mac

By connecting a computer to the USB port (USB-DAC) on the rear panel of this unit using a commercially available USB cable (supplied), this unit can be used as a D/A converter. (p. 29)

- Install the dedicated driver software on the computer to enable communication between the computer and this unit in order to playback high-resolution sound source (DSD signal or 192 kHz/24 bit PCM signal) audio available on the internet. (p. 29)
- Download the driver software from the HD-DAC1 page of the Marantz website.

NOTE

Use a cable that is 10 ft (3 m) or less to connect to the computer.
Connecting a smartphone or portable player

Use this connection to input analog audio signals to this unit and play them back through the amplifier of this unit.
Connecting an iPod or USB memory device to the USB port

You can enjoy music stored on an iPod/iPhone or USB memory device.

- To connect an iPod/iPhone to this unit, use the USB adapter cable that was supplied with the iPod/iPhone.
- For operating instructions see “Playing an iPod” (p. 39) or “Playing files stored on USB memory devices” (p. 43).

Marantz does not guarantee that all USB memory devices will operate or receive power. When using a portable USB hard disk drive (HDD) which came with an AC adapter, use that device’s supplied AC adapter.

**NOTE**

- USB memory devices will not work via a USB hub.
- Playback is not possible when connected via the front panel’s USB port. Connection to a computer is possible via the digital input USB-DAC port (Type B) on the rear panel.
- Do not use an extension cable when connecting a USB memory device. This may cause radio interference with other devices.
**Supported iPod/iPhone models**

- **iPod classic**
  - iPod classic
    - 80GB
  - iPod classic
    - 160GB (2007)
  - iPod classic
    - 160GB (2009)

- **iPod nano**
  - iPod nano
    - 3rd generation (video)
      - 4GB 8GB

  - iPhone 5c
  - iPhone 5s
REMOTE CONTROL jack

When you use this unit connected to a Marantz amplifier, this unit receives operation signals sent from the amplifier and operates accordingly. Next, configure the “Connections” and “Settings”.

Connection

Use the supplied remote connector cable to connect the REMOTE CONTROL IN connector of this unit to REMOTE CONTROL OUT connector of the amplifier.

Setting

Turn the EXTERNAL/INTERNAL switch on the unit to “EXTERNAL”.
- This setting will disable remote sensor reception of this unit.
- To operate the unit, point the remote control at the remote sensor of the amplifier.

To use this unit by itself without connecting an amplifier, turn the switch to “INTERNAL”.
Connecting the power cord

Wait until all connections have been completed before connecting the power cord.

To household power outlet (AC 120 V, 60 Hz)

</table>
Basic operation

Turning the power on

1 Press POWER ◁ to turn on power to the unit.
   The power indicator turns off.

You can also switch the power to standby by pressing ◁ on the main unit.

Switching the power to standby

1 Press POWER ◁.
   The unit switches to standby mode.

NOTE
Power continues to be supplied to some of the circuitry even when the power is in the standby mode. When leaving home for long periods of time or when going on vacation, unplug the power cord from the power outlet.
Selecting the input source

1 Press the input source select button to be played back.

<table>
<thead>
<tr>
<th>Input Source</th>
<th>Description</th>

</tr>
<tr>
<td>AUX</td>
<td>Plays back analog audio signals input to the AUX connector.</td>
</tr>
</tbody>
</table>

You can also select the input source by turning INPUT SELECTOR on the main unit.

Adjusting the volume

1 Press VOLUME ▲▼ to adjust the volume.

You can also adjust the master volume by turning VOLUME on the main unit.

Turning off the sound temporarily (Muting)

Mutes audio output from the headphones and audio output connectors (VARIABLE).

1 Press MUTE ❌.

“MUTE ON” appears in the display.

To cancel mute, press MUTE ❌ again.
Switching the display’s brightness

The display brightness can be adjusted between four levels. Switching the display off reduces a source of noise that affects sound quality, enabling higher sound quality playback.

1 Press DIMMER.

- When the display is turned off, the DISPLAY OFF indicator lights.
- The brightness of the display can also be switched in the setting menu on the display of the main unit.
Using as a D/A converter

Digital audio signals input from an external device or computer into this unit can be converted and output as analog signals using this unit’s D/A converter. (D/A converter function)

- DSD is a registered trademark.
- Microsoft, Windows Vista, Windows 7 and Windows 8 are either registered trademarks or trademarks of Microsoft Corporation in the United States and/or other countries.
- Apple, Macintosh and Mac OS are trademarks of Apple Inc., registered in the U.S. and other countries.
Connecting and playing back from a computer (USB-DAC)

You can enjoy high-quality audio playback from the D/A converter built in to this unit by inputting PCM signal or DSD signal music files into this unit from a computer via USB connection.

- Before USB connecting this unit to your computer, install the driver software in your computer.
- Drivers do not need to be installed for Mac OS.
- Also, you can use whichever commercially available or downloadable player software you like to playback files on your computer.

Computer (recommended system)

**OS**
- Windows® Vista, Windows 7 or Windows 8/8.1
- Mac OS X 10.6.3 or later

**USB**
- USB 2.0: USB High speed/USB Audio Class Ver.2.0

- Installing the dedicated driver (Windows OS only)

1. Disconnect the USB cable between your PC and the unit.
   - The driver software cannot be installed correctly if your PC is connected to the unit by a USB cable.
   - If the unit and your computer are connected by a USB cable and the computer is switched on before installation, disconnect the USB and restart the computer.

2. Download the dedicated driver from the “Download” section of the HD-DAC1 page of the Marantz website onto your PC.

3. Unzip the downloaded file, select the 32-bit or 64-bit exe file that matches your Windows operating system, and double-click the file.
4 Install the driver.

① Select the language to use for the installation.
② Click “OK”.

③ The wizard menu is displayed. Click “Next”.

![USB Audio - InstallShield Wizard](image)
4) Read the Software Licensing Agreement, and click “I accept the terms in the license agreement”.
5) Click “Next”.

6) Click “Install” on the installation start dialog.
   - The installation starts. Do not perform any operation on the PC until the installation is completed.
In the Windows security dialog, select “Always trust software from “DandM Holdings Inc.””. 
Click “Install”.

When the installation is completed, click “Finish”.

With the unit power off, connect the unit and PC using a USB cable (supplied).
- For the connection procedure, refer to the “Connecting a PC or Mac” (p. 18) section.
6 Press POWER \( \textcircled{b} \).
   - When the unit power is turned on, the PC automatically finds and connects to the unit.

7 Press the input source select button (USB-DAC) to switch the input source to “USB-DAC”.

8 Checking the installed driver.
   ① Click the “Start” button and click “Control Panel” on the PC.
      - The control panel setting list is displayed.
   ② Click the “Sound” icon.
      - The sound menu window is displayed.
   ③ Check that there is a checkmark next to “Default Device” under in “Digital Audio Interface” of the “Playback” tab.
      - When there is a checkmark for a different device, click “Marantz USB Audio” and “Set Default”.

9 Checking audio output.
   Outputs a TEST signal from the PC and checks the audio output from the USB-DAC function.
   ① Select “Digital Audio Interface” and click “Properties”.
      - The Digital Audio Interface Properties window is displayed.
2) Click the “Advanced” tab.
3) Select the sampling rate and bit rate to be applied to the D/A converter.
   - It is recommended that “2 channel, 24 bit, 192000 Hz (Studio Quality)” is selected.
4) Click “Apply”.
5) Click “Test”.
   - Check that audio from this unit is output from the PC.

**NOTE**
- The dedicated driver must be installed in the PC before this unit is connected to a PC. Operation will not occur correctly if connected to the PC before the dedicated driver has been installed. Moreover, if the PC is running Windows XP as its OS, the PC’s speed will decrease significantly, and a PC restart may be required.
- Operation may fail in some PC hardware and software configurations.
Audio Device Settings (Mac OS X only)

1. Move the cursor to “Go” on the computer screen, and then click “Utilities”.
   - The utility list is displayed.
2. Double-click “Audio MIDI Setup”.
   - The “Audio Devices” window is displayed.
3. Check that “Use this device for sound output” is checked in “HD-DAC1”.
   - If a different device is checked, select and “Secondary click” on “HD-DAC1”, and then select “Use this device for sound output”.

Select the “HD-DAC1” format.
- It is normally recommended to set the format to “192000.0 Hz” and “2ch-24 bit Integer”.

4. Click “Quit Audio MIDI Setup”.

5. Click “Quit Audio MIDI Setup”.
## Playback

Install the desired player software on your computer beforehand. Use the rear panel USB-DAC port to connect this unit to a computer. ([p. 18](#))

1. **Press USB-DAC to switch the input source to “USB-DAC”**.
   - Start playback on the computer’s player software.
   - The digital audio signal that is being input is shown as follows in the display.

     ```
     “USB-DAC: xxxxxk” or “USB-DAC: DSD xxxM”
     ```

     (xxxx is the sampling frequency.)

   - If the sampling frequency cannot be detected, “Unlocked” will be displayed.
   - “Unsupported” is displayed when audio signals that are not supported by this unit are input.

### Files that can be played back

See “D/A converter” ([p. 62](#)).

### NOTE

- Perform operations such as playback and pause on the computer. At this time, you cannot perform operations with buttons on this unit or the remote control.
- You can also control the volume and equalizer on the computer. Enjoy playing music at the desired volume.
- When this unit is functioning as a D/A converter, sound is not output from the computer’s speakers.
- If the computer is disconnected from this unit while the computer music playback software is running, the playback software may freeze. Always exit the playback software before disconnecting the computer.
- When an error occurs on the computer, disconnect the USB cable and restart the computer.
- The sampling frequency of the music playback software and sampling frequency displayed on this unit may differ.
- Use a cable that is 10 ft (3 m) or less to connect to the computer.
Connect and playback from a digital device (COAX/OPT1/OPT2)

1 Press COAX, OPT1 or OPT2 to switch the input source to “COAX”, “OPT1” or “OPT2”.

The digital audio signal that is being input is shown as follows in the display.

“COAX xxxk” or “OPT1 xxxk” or “OPT2 xxxk”

(“xxxx” is the sampling frequency.)

- If the sampling frequency cannot be detected, “Unlocked” will be displayed.
- “Unsupported” is displayed when audio signals that are not supported by this unit are input.

Files that can be played back

See “D/A converter” (p. 62).

NOTE

- Do not input non-PCM signals, such as Dolby Digital, and DTS. This causes noise and could damage the speakers.
- If the sampling frequency switches, such as from A mode to B mode in a CS broadcast, muting may operate for 1 – 2 seconds, cutting the sound.
You can use the USB cable provided with the iPod to connect the iPod with the unit's USB port and enjoy music stored on the iPod.

For information on the iPod models that can be played back with this unit, see “Supported iPod/iPhone models” (p. 21).
Playing an iPod

1. Press iPod/USB to switch the input source to “iPod/USB”.

2. Connect the iPod to the USB port. (☞ p. 20) “Direct iPod” is displayed on the display of this unit.

3. Operate iPod itself directly while seeing the iPod screen to play back music.

The iPod display modes include “Direct iPod” and “Remote iPod”. By default, “Direct iPod”, where you directly operate the iPod itself while looking at the iPod screen, is set.

**NOTE**
- Marantz will accept no responsibility whatsoever for any loss of iPod data.
- Depending on the type of iPod and the software version, some functions may not operate.

</tr>
</tbody>
</table>

Performing random playback

1 Press RANDOM 

- The current random play mode is indicated in the display first.
- The random playback mode is switched each time the button is pressed.

<table>
<thead>
<tr>
<th>Random Off (Random off):</th>
<th>Disable random playback.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Random On (Random on):</td>
<td>Randomly play back all tracks in the current playback folder.</td>
</tr>
</tbody>
</table>

Charging the iPod

You can charge an iPod or iPhone when the input source is switched to “iPod/USB” and the iPod or iPhone is connected to the USB port.

- If the unit enters power standby mode while the iPod/iPhone is charging, the unit will switch to standby charging mode, and the iPod/iPhone will continue to be charged. When in standby charging mode, the power display light turns orange. When charging is completed, the unit enters normal power standby mode and the power indicator turns red.
Playing a USB memory device

- Playing back music stored on a USB memory device.
- Only USB memory devices conforming to mass storage class standards can be played on this unit.
- This unit is compatible with USB memory devices in “FAT16” or “FAT32” format.
- This unit can play back the following files.
  - WMA
  - MP3
  - WAV
  - AAC
Playing files stored on USB memory devices

1. Press iPod/USB to switch the input source to “iPod/USB”.

2. Connect the USB memory device to the USB port. (p. 20)

3. Press “MODE” to select “Folder” or “All”.

   About the display
   - When “Folder” is selected
     All the files in the selected folder are played.
   - When “All” is selected
     After the selected folder and files are played, all the files in all the folders are played.

4. Use △▽ to select the file or folder, then press ENTER.

5. Use △▽ to select the file, then press ENTER.
   Playback starts.

Resume function

This unit stores the point at which playback of a file was stopped.

- Resume playback works even if the USB memory device is disconnected and then reconnected. However, if a different USB memory device is connected, the resume information for the previous USB memory device is deleted.
- The resume information may be deleted when the USB memory device is removed and files are added or deleted.
- Press ■ while playback is stopped to delete the resume information. “Resume Off” is displayed.

NOTE
- Do not remove the USB memory device from the unit when the USB memory communication indicator is flashing. Doing so may damage the USB memory device, or may corrupt the files recorded on the USB memory device.
- Note that Marantz will accept no responsibility whatsoever for any problems arising with the data on a USB memory device when using this unit in conjunction with the USB memory device.

### Files that can be played back

See “Playing back a USB memory devices” (p. 59).

### Switching the display

During playback, press INFO.

- This switches between the file name, title name, artist name, album name and file number.
- While a WAV file is being played back, only the file name is displayed.
- The player can display the following characters:

```
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789
! " # $ % & : ; < > ? @ \ [ ] _ ` { } ~ ^ ' ( ) * + , - . / = (space)
```

Files that can be played back

See “Playing back a USB memory devices” (p. 59).
Performing repeat playback

1. Press REPEAT ．
   - The current repeat play mode is indicated in the display first.
   - The repeat playback mode is switched each time the button is pressed.

<table>
<thead>

</tbody>
</table>
Playing audio from devices connected to the AUX connector

You can connect a smartphone or portable player to the AUX connector of this unit and play back audio.

1. Press AUX to switch the input source to “AUX”.

2. Connect a smartphone or portable player to the AUX connector of this unit. (☞ p. 19)

3. Play the component connected to this unit.
Menu map

By default, this unit has recommended settings defined. You can customize this unit based on your existing system and your preferences.

<table>
<thead>
<tr>
<th>Setting items</th>
<th>Description</th>

<td>50</td>
</tr>
</tbody>
</table>

* Displayed when SETUP is pressed on this unit.
Menu operation

1 Press SETUP to select the menu to be set.
   Each time you press SETUP, the setting item changes.

2 Use ◀▶ to change to desired setting.
   - You can also change the setting by turning INPUT SELECTOR on the main unit.

3 Press SETUP or ENTER to return to the normal display.
   - The display returns to the normal display if no operations are performed for 5 seconds after configuring settings on the main unit.
   - To return to the previous item, press BACK.
AMP Gain

Set the gain of the headphone amplifier. Set this according to the impedance of the connected headphones. It is recommended that this is set on the “Low” side if the headphones have low impedance and on the “High” side if they have high impedance.

**Low** (Default):
Set the gain of the headphone amplifier to “Low”.

**Mid**:
Set the gain of the headphone amplifier to “Mid”.

**High**:
Set the gain of the headphone amplifier to “High”.

**NOTE**
The headphone volume varies depending on the “AMP Gain” setting. Decrease the volume or mute the audio first if changing this setting while listening to audio.

Dimmer

This switches the brightness of the display.

**Off**: Turns the display off.

**Dark**: Very low display brightness.

**Dim**: Reduced display brightness.

**Bright** (Default):
Normal display brightness.

You can also adjust the display by pressing DIMMER on the remote control unit.

iPodMode

Set whether to operate the iPod from this unit or on the iPod.

**Direct** (Default):
Operate the iPod on the iPod itself.

**Remote**:
Operate the iPod from this unit and the remote control unit.

Operation mode can also be switched by pressing MODE on the remote control unit.
**AutoStby**

When this unit is in the stop state and there is no input signal and operation for 30 minutes, it automatically enters the standby mode.

| On: Enable Auto Standby mode. |
| Off (Default): Disable Auto Standby mode. |

When iPod is being charged, this unit enters the power standby mode after charging.

Tips

I want to enjoy analog output audio at higher quality
• Press the DIMMER button to turn the display off. (p. 27)

I want to playback just the specified folder
• Press the MODE button to set the playback mode to “Folder”. (p. 43)

I want to delete the resume information for playback of a USB memory device
• In the stop mode, press the  button.

I want to display the title, etc. of the file currently playing back on the iPod on this unit’s display
• Press the MODE button to set Remote iPod mode. (p. 40)

I want to playback WAV files
• This unit can playback WAV files that are stored on a USB memory device. (p. 42)

I want to adjust the volume with the volume controls of this unit when the Power Amplifier is connected
• Connect the Power Amplifier to the audio output connectors (VARIABLE). (p. 16)
## Troubleshooting

1. Are the connections correct?
2. Is the set being operated as described in the owner’s manual?
3. Are the other devices operating properly?

If this unit does not operate properly, check the items listed in the table below.

Should the problem persist, there may be a malfunction. In this case, disconnect the power immediately and contact your store of purchase.

### Power does not turn on / Power is turned off

<table>

Maximum number of playable files and folders
Number of files: 65,535
Number of folders: 700
This unit can only play music files that are not copyright protected.

- Content downloaded from pay sites on the Internet are copyright protected. Also, files encoded in WMA format when ripped from a CD, etc., on a computer may be copyright protected, depending on the computer’s settings.

NOTE

- It is not compatible with an MP3 player, digital camera, a USB device for a mobile phone, etc.
- The unit cannot charge a USB device.

### Playback order of files

When there are multiple folders containing music files, the playback order of folders is automatically set when this unit reads the media. The files in each folder are played back in the order in which the files were recorded on the media, from the oldest date and time.

- For playback of files recorded on USB, files in the first folder on the first layer are played first, next folders on the second layer in the folder, then next on the third layer, and so on in this order. Then accordingly files on another first layer are played.

The playback order displayed on a PC may differ from the actual playback order.

NOTE

The playback order may differ from the order in which the folders or files were recorded if you delete or add a folder or file on USB. This occurs because of data recording specifications and is not a malfunction.
About folders and files

Music files recorded on a USB memory device are divided into large segments (folders) and small segments (files). Files are stored in folders, and folders can be placed for storage in a hierarchy. The unit can recognize up to 8 levels of folders.

How to handle media

- Do not eject a USB memory device or turn off the unit while a USB memory device is being played. This may result in malfunction or loss of the USB memory device’s data.
- Do not attempt to open or modify a USB memory device.
- USB memory device and files can be damaged by static electricity. Do not touch the metal contacts of a USB memory device with your fingers.
- Do not use warped USB memory device.
- After use, be sure to remove any disc or USB memory device, and store it in its proper case, to avoid dust, scratches and deformation.
- Do not store discs in the following places:
  1. Places exposed to direct sunlight for long periods of time
  2. Dusty or humid places
  3. Places exposed to heat from heaters, etc.

</tbody>
</table>
DSD (Direct-Stream Digital)
One of the audio data recording methods, it is the signal aspect used to store audio signals on a super audio CD, and is Δ-Σ modulated digital audio. It is configured of an array of single bit values at a 2.8224MHz sampling rate.

MP3 (MPEG Audio Layer-3)
This is an internationally standardized audio data compression scheme, using the “MPEG-1” video compression standard. It compresses the data volume to about one eleventh its original size while maintaining sound quality equivalent to a music CD.

MPEG (Moving Picture Experts Group), MPEG-2, MPEG-4
These are the names for digital compression format standards used for the encoding of video and audio. Video standards include “MPEG-1 Video”, “MPEG-2 Video”, “MPEG-4 Visual”, “MPEG-4 AVC”. Audio standards include “MPEG-1 Audio”, “MPEG-2 Audio”, “MPEG-4 AAC”.

WMA (Windows Media Audio)
This is the audio compression technology developed by Microsoft Corporation.
WMA data can be encoded using Windows Media® Player.
To encode WMA files, only use applications authorized by Microsoft Corporation. If you use an unauthorized application, the file may not work properly.

Sampling frequency
Sampling involves taking a reading of a sound wave (analog signal) at regular intervals and expressing the height of the wave at each reading in digitized format (producing a digital signal).
The number of readings taken in one second is called the “sampling frequency”. The larger the value, the closer the reproduced sound is to the original.
Dynamic range
The difference between the maximum undistorted sound level and the minimum discernible level above the noise emitted by the device.

Bit rate
This expresses the read amount per 1 second of video/audio data recorded in a disc. A larger number means higher sound quality, but also means a larger file size.

Linear PCM
This is an uncompressed PCM (Pulse Code Modulation) signal. This is the same system used for CD audio but uses 192 kHz, 96 kHz, and 48 kHz sampling frequencies on Blu-ray Disc or DVD and provides higher resolution than CD.

  Input sensitivity/impedance: 200 mVrms/22 kΩ/kohms

• Digital input
  Coaxial: 0.5 Vp-p / 75 Ω/ohms
  Optical: –27 dBm or later
  USB (Front): USB Type A (USB 2.0 Full speed)
  USB (Rear): USB Type B (USB 2.0 High speed)

■ General

  Power supply voltage/frequency: AC120 V, 60 Hz
  Power consumption (EN60065): 35 W
  Power consumption in standby mode: 0.3 W

For the purpose of improvement, the specifications and design are subject to change without notice.
Dimensions (Unit: in. (mm))

- **Weight**: 11 lbs (5 kg)
