Integrated Amplifier

PM8003

User Guide
CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK) NO USER-SERVICEABLE PARTS INSIDE REFER SERVICING TO QUALIFIED SERVICE PERSONNEL

NOTE:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE:
Changes or modifications may cause this unit to fail to comply with Part 15 of the FCC Rules and may void the user's authority to operate the equipment.

DECLARATION OF CONFORMITY

This device complies with Part 15 of the FCC rules. Operation is subject to the following conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

U.S. Responsible Party: Marantz America, Inc.
100 Corporate Drive,
Mahwah, NJ, 07430, U.S.A.
TEL: 201-762-6500

Type of Product: Integrated Amplifier
Model: PM8003
IMPORTANT SAFETY INSTRUCTIONS
READ BEFORE OPERATING EQUIPMENT

This product was designed and manufactured to meet strict quality and safety standards. There are, however, some installation and operation precautions which you should be particularly aware of.

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacture's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

Additional Safety Information!

- This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer’s instructions have been adhered to.
- Apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.
- When the switch is in the OFF position, the apparatus isn’t completely switched-off from the MAINS.
- The equipment shall be installed near the power supply so that the power supply is easily accessible.
- Do not touch hot areas, especially around the “hot surface mark” during and immediately after use.
- During and immediately after use, this product is hot in areas other than the controls and rear panel connection jacks.
- Do not touch hot areas, especially around the “hot surface mark” and the top panel. Contact with hot areas can cause burns.

- Do not expose the unit and batteries to excessive heat such as direct sunlight, fire or the like.
- Make a space of about 8 inches (0.2 m) around the unit.
INTRODUCTION
Thank you for selecting the Marantz PM8003 Integrated amplifier for your Audio system. Please read these operating instructions carefully. We recommend that you read the entire user guide before you attempt to connect or operate the amplifier. After you have reviewed the contents of this manual, we suggest that you make all system connections before you attempt to operate the unit.

ACCESSORIES CHECK
Before use, check the below accessories were included in the package.

- Remote controller
- User Guide
- Warranty Card
  USA x 1
  Canada x 1
- Size “AAA” batteries x 2
- AC Power cord

This section must be read before any connection is made to the mains supply.

**Equipment Mains Working Setting**

Your Marantz product has been prepared to comply with the household power and safety requirements that exist in your area. PM8003 can be powered by 120V AC only.

**Copyright**

Recording and playback of any material may require consent. For further information refer to the following:

- Copyright Act 1956
- Dramatic and Musical Performers Act 1958
- Performers Protection Acts 1963 and 1972
- Any subsequent statutory enactments and orders

**Do Not Locate in the Following Places**

To ensure long-lasting use, do not locate the unit where:

- Exposed to direct sunlight.
- Near to sources of heat such as heaters.
- Highly humid or poorly ventilated.
- Dusty.
- Subjected to mechanical vibrations.
- On wobbly, inclined or otherwise unstable surfaces.
- Radiated heat is blocked such as in cramped audio racks.

**Keep Objects Off**

Keep objects off the unit. Blocking the vent can result in accident and damage.

**Do Not Touch Hot Spots During and Immediately After Use**

During and immediately after use, the unit is hot in areas other than the controls and rear panel connection jacks. Do not touch hot spots and especially the top panel. Contact with hot areas can cause burns.
CAUTIONS ON HANDLING BATTERIES
Misuse of the batteries can result in electrolyte leakage, rupturing, corrosion, etc. Bear in mind the following points when using batteries.

- Remove the batteries from the remote control unit if the unit is not going to be used for a prolonged period (a month or more).
- Do not use an old battery together with a new one.
- Insert the batteries while ensuring that their + and - poles are properly aligned with the corresponding markings on the remote control unit.
- Batteries with the same shape may have different voltages. Do not use different types of batteries together.
- If electrolyte has leaked, thoroughly wipe the inside of the battery compartment, and then insert new batteries.
- When batteries which are no longer required are to be discarded, follow the directions (regulations) laid down by the local authorities in the area concerned for their disposal.

OPERATIONAL RANGE
Operate the unit with the remote controller within the range of the illustration below.

Approx. 16.4 ft.
(5 m)

Remote controller

Precautions
- Do not allow direct sunlight, an inverter fluorescent light or other strong source of light to shine onto the player’s infrared signal reception window (remote sensor). Otherwise, the operation of the remote control unit may be disabled.
- Bear in mind that operating the remote control unit may cause other devices operated by infrared rays to be operated by mistake.
- The remote control unit cannot be operated if the space between the controller and the player’s remote sensor is obstructed.
- Do not place any objects on top of the remote control unit. Doing so may cause one or more buttons to be held down which will cause the batteries to run down.
Names and Functions

**Front Panel**

1. **Power ON/OFF Button**
   - Pressing this button once turns power to the amplifier ON, and pressing it again turns power to the amplifier OFF. When the button is in the ON position, power can be switched ON/OFF using the remote controller. If the power is switched OFF using the remote controller, the amplifier engages in standby mode. When in this mode, you cannot switch the power ON by pressing the POWER ON/OFF button. The amplifier remains in standby mode even if this button is pressed. To switch the power ON, either turn the INPUT SELECTOR knob or press the POWER ON button on the remote controller.

2. **STANDBY Indicator**
   - This indicator is lit red when the amplifier is in standby mode. When in standby mode, you can switch the power ON by using the POWER ON button on the remote controller. If the amplifier’s protective circuit activates, this indicator flashes.

3. **Input Selector Knob**
   - This knob selects the input source for playback. The selected input source is displayed on the function indicator. The amplifier memorizes the selected input source when the power is turned OFF, and then reselects the same input source when the power is turned ON again.

4. **Function Indicator**
   - This indicator displays the input source currently selected by the INPUT SELECTOR knob.

5. **Mute Indicator**
   - When the MUTE button on the remote controller is pressed, the MUTE function is activated and the volume is lowered. Pressing the MUTE button again releases the MUTE function. Moreover, the MUTE function can also be released by pressing the VOLUME +/– button on the remote controller. If the amplifier’s protective circuit activates, this indicator flashes for approx. 15 seconds and the volume decreases.

6. **Power Amp Direct Button**
   - The POWER DIRECT IN jacks are provided on the rear panel of the unit. Holding this button pressed for more than 3 seconds lights the indicator around the button, and this unit functions as the power amplifier. In this status, the sound volume cannot be adjusted by turning the VOLUME knob. To release POWER AMP DIRECT mode, hold this button pressed for more than 3 seconds again.

7. **Source Direct Button**
   - Pressing this button lights the indicator around the button. The signal bypasses the balance and tone control circuits, boosting sound quality. When this button is set to ON, the BALANCE, BASS, and TREBLE knobs are disabled.

8. **Volume Knob**
   - Turning this knob clockwise increases the volume, while turning it counterclockwise decreases the volume. The volume can also be adjusted using the remote controller. If the amplifier’s protective circuit activates, the VOLUME knob automatically turns for approx. 15 seconds and the volume decreases.

9. **Infrared Receptor Window**
   - This is the receptor of control signals sent from the remote controller. Point the remote controller towards this window to properly transmit signals.

10. **Balance Knob**
    - This knob is for selecting the speakers connected to the SPEAKERS SYSTEM A and/or B terminals on the rear panel. When you use headphones, set the knob to OFF.

11. **Tone Control Knobs (Bass/Treble)**
    - These knobs are used to adjust the BASS and TREBLE sound level. Turning the knobs clockwise increases the sound level, and turning them counterclockwise decreases the sound level. Please note that these knobs do not function when the SOURCE DIRECT button is in the ON position.

12. **Speakers Knob**
    - This knob is for selecting the speakers connected to the SPEAKERS SYSTEM A and/or B terminals on the rear panel. When you use headphones, set the knob to OFF.

13. **Phones Jack**
    - This jack is for connecting headphones with a standard stereo plug. To listen with headphones, turn the speaker output OFF by setting the SPEAKERS knob in the OFF position.
Using this remote controller, you can control this unit and Marantz CD players, DVD players, tuners, tape decks etc. that have a remote control receptor. The operations possible by remote controller may differ with each component; therefore see the instruction manual that came with the component.

The remote controller buttons are laid out as shown below.

1 **POWER ON/STANDBY buttons**

**POWER ON button**

Turns the unit power on when it is in the standby mode.

**POWER OFF button**

Sets the unit power to the standby mode when it is set to the power-on mode.

**SOURCE POWER button**

Switching the mode of a CD player, DVD player or other Marantz component equipped with a power standby function between power-on and standby is enabled by pressing this button after the INPUT SOURCE button corresponding to the component has been pressed.

When this button is pressed after pressing the TUNER button, the tuner’s power is turned on; when it is pressed again, the tuner is set to the standby mode.

When this button is pressed after pressing the AMP button, the unit is switched from the power-on mode to the standby mode or vice versa.

* The remote controller cannot be used to turn the primary power of the amplifier ON and OFF.

2 **Input selector buttons**

**Input source Button**

These buttons are for directly selecting the input source.

**Caution:**

Some input jacks of this unit and the corresponding input selector buttons on the remote controller differ, as shown below.

<table>
<thead>
<tr>
<th>The unit</th>
<th>Buttons on the remote controller</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUX/DVD</td>
<td>AUX, DVD</td>
</tr>
<tr>
<td>RECORDER2</td>
<td>TAPE, MD</td>
</tr>
</tbody>
</table>

For the input sources shown in the table above, although the same jacks are used for two types of sources on the unit, separate buttons are provided on the remote controller.

When using the remote controller for operation of a Marantz component connected to the unit, select the input source first, then perform operations.

**INPUT ▲ Button**

This button is for forward-feeding the input source indications to select a desired source.

The input source indication, which is displayed on the function indicator on the main frame, is fed to the right.

**INPUT ▼ Button**

This button is for backward-feeding the input source indications to select a desired source.

The input source indication, which is displayed on the function indicator on the main frame, is fed to the left.

3 **VOLUME adjustment buttons**

**MUTE Button**

This button activates the mute function. Pressing this button again releases the MUTE function. The MUTE function can also be released by pressing either the VOLUME + or – buttons.

**VOLUME + Button**

This button increases the volume level.

**VOLUME – Button**

This button decreases the volume level.

4 **SOURCE DIRECT button**

This button is for switching Source Direct mode ON or OFF.

5 **Component operating buttons**

These buttons are for performing basic operations of a Marantz CD player, DVD player, etc. The function of each button changes to match the component selected as the input source using the input selector buttons.

For details, see page 12.
**Names and Functions**

**REAR PANEL**

1. **PHONO Input jacks**
   These jacks are for connecting to an analog record player. MM cartridges can be used.

2. **PHONO GND terminal**
   Connect the grounding wire from an analog record player.

3. **PRE OUT jacks**
   These jacks are for connection via the input jacks of another main amplifier or active subwoofers. These jacks cannot be used in Power Amp Direct mode.

4. **POWER AMP DIRECT IN jacks**
   These jacks are used as input jacks when you use this unit as a power amplifier in Power Amp Direct mode. If you use another preamplifier, connect it via these jacks. In this status, the sound volume cannot be adjusted by turning the VOLUME knob.

5. **SPEAKERS SYSTEM A, B output terminals**
   You can connect 2 speaker systems, SYSTEM A and SYSTEM B. Speaker output can be turned ON/OFF from the SPEAKERS knob on the front panel.

6. **AC IN socket**
   Connect the supplied AC power cable to this socket and a power outlet.

7. **REMOTE CONTROL jacks**
   These jacks are for connecting to other Marantz components such as a CD player or DVD player that has a remote control connector (D.BUS jack). You can use the remote controller supplied with the unit to control the system. For more details, see page 11.

8. **RECORDER 1/RECORDER 2 output jacks**
   These jacks are for connecting to the recording input jacks of a CD-R recorder, MD deck, tape deck, etc.

9. **RECORDER 1/RECORDER 2 input jacks**
   These jacks are for connecting to the output jacks of a CD-R player, MD deck, tape deck, etc.

10. **AUX/DVD input jacks**
    These jacks are for connecting to the output jacks of a DVD player or other audio component.

11. **TUNER input jacks**
    These jacks are for connecting to the output jacks of a tuner or other audio component.

12. **CD input jacks**
    These jacks are for connecting to the output jacks of a CD player or similar component.
**BASIC CONNECTIONS**

**CONNECTING AUDIO COMPONENTS**

- **Record Player**
  - To LINE OUT jacks
- **CD player**
  - To LINE OUT jacks
- **Tuner**
  - To LINE OUT jacks
- **DVD Player**
  - To LINE OUT jacks
- **CD-R, etc.**
  - To LINE IN jacks
  - To LINE OUT jacks
- **MD or Tape deck, etc.**
  - To LINE IN jacks
  - To LINE OUT jacks

**Caution:**

- Do not connect the power cord of this amplifier or any of the other components to the power supply until all of the connections are completed.
- Insert the plugs of the connections cords firmly into the connecting jacks. Incorrect insertion may cause noise.
- Connect the wires correctly to the L (left) and R (right) channels.
- Make sure that input and output are connected correctly.
- Refer also to the instruction manuals of components to connect equipment correctly.
**BASIC CONNECTIONS**

**CONNECTING SPEAKER SYSTEMS**

Your speaker system must satisfy the below conditions. If it does not, this unit’s protective circuit will active, whereby preventing proper playback. In some cases, the amplifier and speakers may be damaged.

- If using 1 set of speakers, total speaker impedance must be 4Ω or more.
- If using 2 sets of speakers, total speaker impedance must be 8Ω or more.

**WIRING SPEAKER CABLE**

- Peel off the coating of speaker cable as shown below.

> Approx. 1 cm

- Cut the coating of cable.
- Peel off the edge of cable.
- Twist conductors.

- Wiring with speaker cable.

- Turn counterclockwise to loosen.

- Insert conductor of cable.
- Turn clockwise to tighten.

**CONNECTIONS OF AC POWER CABLE**

1. Plug the supplied AC power cable to the AC IN socket on the rear panel of the main unit.
2. Plug the power cable into an AC outlet.

**Notes:**

- To prevent damage to circuitry, do not let the bare speaker wires touch each other and do not let them touch any metal part of this unit.

- Do not touch the speaker terminals when the power is on. It may cause you to receive an electric shock.

- Be sure to connect the positive and negative cables for the speaker properly. If they are misconnected, the signal phase will be reversed and the signal quality will be corrupted.
Playback

To explain how to play back input sources, representative examples are given with a CD player and analog record player. Before starting either procedure, check the component is correctly connected to the unit.

**Disc Playback on an CD Player**

1. Press the power ON/OFF button of the CD player to activate power to it.
2. Press the POWER ON/OFF button 1 to activate power to it. Approximately 8 seconds after power has been activated, the muting turns OFF and audio output is enabled.
3. Select the CD with the INPUT SELECTOR knob 3.
4. To use the speakers connected to the SPEAKERS SYSTEM terminals, set the SPEAKERS knob 12.
5. Load a disc into the CD player and press the play button to start playback.
6. Adjust the volume with the VOLUME knob 8.
7. Adjust bass/treble as desired with the BASS and TREBLE knobs 9. Be sure to first set the SOURCE DIRECT button 7 in the OFF position.

**Disc Playback on an Analog Record Player**

1. Press the POWER ON/OFF switch 1 to activate power to it. Approximately 8 seconds after power has been activated, the muting turns OFF and audio output is enabled.
2. Select “PHONO” as the input source with the INPUT SELECTOR knob 1. To prevent unexpected accidents, it is recommended to set the volume level to MIN. by turning the VOLUME knob 8 until muting the volume level.
3. MM type cartridges can be connected. Use a step-up transformer when using an MC cartridge.
4. To use the speakers connected to the SPEAKERS SYSTEM terminals, set the SPEAKERS knob 12.
5. Set a record on the analog record player and play it.
6. Adjust the volume level with the VOLUME knob 8.
7. Adjust bass/treble as desired with the BASS and TREBLE knobs 9. Be sure to first set the SOURCE DIRECT button 7 in the OFF position.
ADVANCED CONNECTIONS

CONNECTING POWER DIRECT IN JACKS

If you use a preamplifier, connect it as shown below, and then you can use this unit as a power amplifier. Set the POWER AMP DIRECT IN button on the front panel of the unit to its ON position. For details on operations of the preamplifier, refer to the instruction manual supplied with the preamplifier to be used.

CONNECTING PRE OUT JACKS

If you use a power amplifier, connect it as shown below, and then you can use this unit as a preamplifier. For connecting speaker systems, refer to the instruction manual supplied with the power amplifier to be used.

Note:

If you use this unit as a power amplifier, the preamplifier section does not function, and the INPUT SELECTOR, SOURCE DIRECT, VOLUME, BASS, TREBLE, and BALANCE knobs are disabled.
BI-WIRE CONNECTIONS

BI-WIRE connection is a technique for improving sound quality. It connects speaker systems and an amplifier, using two speaker cables; one for mid-to-high range speakers and another for bass speakers. It eliminates the influence on a mid-to-high range speaker unit due to back electromotive force generated by the bass speaker unit.

For BI-WIRE connection, a speaker system must comply with the BI-WIRE connection specifications. Refer to the instruction manual supplied with the speaker system.

Connect a mid-to-high range speaker via the SYSTEM A terminals and a bass speaker via the SYSTEM B terminals. Then set the SPEAKER knob on the front panel in the A+B position.

CONNECTING REMOTE CONTROL JACKS

The REMOTE CONTROL jacks are for connecting components that are capable of remote control (D.BUS jacks) such as a Marantz CD Player or DVD Player. This enables these other components to be operated with the remote controller included with the unit. The unit comes with the system remote controller that can operate the basic features of Marantz CD Players and DVD Players. Here, a brief explanation of how to control the unit and CD Player using this remote controller is provided.

As shown in the illustration below, connect the REMOTE CONTROL “IN” jack of the CD Player to the REMOTE CONTROL “OUT” jack of the unit, and set the CD Player switch to “EXTERNAL”.

Both this model and CD Player can be operated by pointing the remote controller at the receptor of this model.
### Remote Controller Operation

#### CD
When the CD button is pressed, the buttons in group $\mathbb{S}$ function as indicated in the table below. These buttons can only be used when a Marantz CD player is connected to the CD input jacks.

#### TAPE
When the RECORDER 2 (TAPE) button is pressed, the buttons in group $\mathbb{S}$ function as indicated in the table below. These buttons can only be used when a Marantz tape deck is connected to the RECORDER 2 (TAPE) jacks.

## TROUBLESHOOTING

### BEFORE CONSIDERING IT AS A FAILURE

In case of trouble with this component, first check the following before calling for service. What seems to be a serious malfunction is often due to a simple operation mistake. If the trouble is not fixed after making the following checks, contact the place of purchase, your nearest Marantz dealer, our customer service center, or our repair service center.

### ABOUT THE PROTECTIVE CIRCUIT

This unit is equipped with a protective circuit to protect the amplifier circuits and speaker system against damage.

If the protective circuit is activated, the sound is instantly muted.

In this case, either the MUTE indicator flashes, or the STANDBY indicator above the POWER ON/OFF button flashes.

#### AT POWER ON

For about 8 seconds after the power is turned on, the protective circuit is activated muting the sound to give the amplifier circuits time to stabilize. Once the amplifier circuits stabilize, the protective circuit releases and audio is enabled.

#### IN THE EVENT OF OVERCURRENT

The protective circuit is activated if current exceeding a certain level is detected, which can happen if excessive signal flow is input to the amplifier or if the unit is connected to a speaker system of less than 4Ω impedance. The protective circuit is also activated if a speaker cable shorts. In these cases, the MUTE indicator flashes, and the volume is automatically reduced. Approximately 15 seconds later, the protective circuit is released, therefore the volume needs readjusting to continue normal use.

Moreover, if the overcurrent continues, the amplifier's power shuts OFF and the STANDBY indicator above the POWER ON/OFF button flashes.

#### IN THE EVENT OF AMPLIFIER TROUBLE

The protective circuit is activated and the power is automatically shut OFF if an abnormality is detected in the power circuit. The same happens if the main fuse inside the amplifier blows. In these cases, the STANDBY indicator above the POWER ON/OFF button flashes.

In cases as mentioned above, immediately disconnect the power cord, and contact the place of purchase, your nearest Marantz dealer, our customer service center, or our repair service center.

### IF THE MAIN-AMPLIFIER OVERHEATS

The protective circuit is activated if the temperature of the main-amplifier section rises above a certain level, which can happen if the amplifier is continually used with excessive signal flow being input into it. The protective circuit is also activated when the set operating temperature is exceeded, which can happen if the vents on top of the amplifier are covered, or if the amplifier is installed on a cramped audio rack. In these cases, the MUTE indicator flashes, and the volume is automatically reduced. Approximately 15 seconds later, the protective circuit is released, therefore the volume needs readjusting to continue normal use.

If the temperature does not sufficiently lower within a certain amount of time after the protective circuit activation, the power shuts OFF and the STANDBY indicator above the POWER ON/OFF button flashes.

#### IF EXCESSIVE ULTRA-BASS SIGNALS ARE INPUT

The protective circuit is also activated if ultra-bass signals that exceed the base signal range settings are input. In this case, the MUTE indicator flashes, and the volume is automatically reduced. Approximately 15 seconds later, the protective circuit is released, therefore the volume needs readjusting to continue normal use. If excessive ultra-bass signal input continues or if DC voltage is detected due to trouble with the amplifier, the power shuts OFF and the STANDBY indicator above the POWER ON/OFF button flashes.
## OTHERS

### SPECIFICATIONS & DIMENSIONAL DRAWINGS

**Power output (20Hz – 20kHz simultaneous drive of both channels)***
- 70W x 2 (8Ω load)
- 100W x 2 (4Ω load)

**Total harmonic distortion (20Hz – 20kHz simultaneous drive of both channels, 8Ω load)**
- 0.02%

**Output band width (8Ω load, 0.05%)***
- 5Hz – 60kHz

**Frequency response (CD, 1W, 8Ω load)**
- 5Hz – 60kHz

**Dumping factor (8Ω load, 20Hz – 20kHz)**
- 100

**Input sensitivity/Input impedance**
- PHONO (MM) 2mV/47kΩ
- CD, LINE, TUNER, AUX/DVD, RECORDER 200mV/20kΩ
- POWER AND DIRECT IN 1.6V/20kΩ

**Output voltage/Output impedance**
- PRE OUT 1.6V/600Ω

**Maximum allowable PHONO input level (1kHz)**
- MM 100mV
- RIAA deviation (20Hz – 20kHz) ±0.5dB

**S/N (IHF-A, 1W, 8Ω load)**
- PHONO (MM) 87dB
- CD, LINE, TUNER, AUX/DVD, RECORDER 90dB
- POWER AMP DIRECT IN 106dB

**Tone control**
- Bass (50Hz) ±10dB
- Treble (20kHz) ±10dB

**Power requirement**
- AC 120V 60Hz

**Power consumption**
- (UL60065) 200W

**Standby power consumption**
- 0.3W

**Accessories**
- Remote controller
- AAA batteries 2
- Detachable AC power cable
- Maximum outer dimensions (Amplifier)
  - Width 17-5/16 inch (440mm)
  - Height 5-1/8 inch (129.8mm)
  - Depth 15 inch (379mm)
  - Weight (Amplifier) 26.5 lbs (12.0kg)

Specifications subject to change without prior notice.

**UNIT : inch (mm)**
### CLEANING OF EQUIPMENT EXTERNAL SURFACES

The exterior finish of your unit will last indefinitely with proper care and cleaning. Never use scouring pads, steel wool, scouring powders or harsh chemical agents (e.g., lye solution), alcohol, thinner, benzine, insecticide or other volatile substances as these will mar the finish of the equipment. Likewise, never use cloths containing chemical substances. If the equipment get dirty, wipe the external surfaces with a soft, lint-free cloth.

If the equipment becomes heavily soiled:

- dilute some washing up liquid in water, in a ratio of one part detergent to six parts water.
- dip a soft, lint-free cloth in the solution and wring the it is damp.
- wipe the equipment with the damp cloth.
- dry the equipment by wiping it with a dry cloth.

### USING HEADPHONES

If the volume in the headphones is too high, it may injure your ears. Do not set the sound volume too high.

### REPAIRS

Only the most competent and qualified service technicians should be allowed to service the factory-trained warranty station personnel have the knowledge and special facilities needed for repair and calibration of this precision equipment. After the warranty period has expired, repairs will be performed for a charge if the equipment can be returned to normal operation.

In the event of difficulty, refer to your dealer or write directly to the nearest location to you that is listed on the Marantz Authorized Service Station list. If writing, please include the model and serial number of the equipment together with a full description of what you think is abnormal about the equipment’s behaviour.
